EDUCATION

Manipal Institute of Information Technology, Manipal

B.Tech in Computer and Communication Engineering 2023 – 2027

• **GPA:** 7.41

• **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming (Java), Database Management Systems (MySQL), Operating Systems, Software Engineering, Information Security (Python)

PROJECTS

FindIt, Community Lost & Found Platform ([Live](#) 🌐 | [Repository](#) 📁)

2025

- ❑ Built a production-ready, location-driven app (React 18 + TS + Vite) with Google Maps clustering, dark mode, and a polished, accessible UI.
- ❑ Designed a typed Supabase/PostgreSQL + PostGIS backend with geospatial queries, PLSQL functions, and end-to-end type safety.
- ❑ Delivered real-time notifications, lost↔found matching with dual-confirmation returns, AI-powered filtering, trust scoring, and performance optimizations, deployed via Vercel.

NutriTrack, Comprehensive Diet based Healthcare System ([Live](#) 🌐 | [Repository](#) 📁)

2025

- ❑ Engineered a full-stack Diet & Nutrition app (React 18 + Vite, Node.js/Express, MySQL) with JWT authentication and RBAC, improving security and maintainability of user workflows.
- ❑ Optimized performance and data integrity by implementing transaction-safe scheduling and delegating meal/exercise logging to MySQL stored procedures, reducing conflicts and query overhead.
- ❑ Delivered a polished, mobile-first UX with Tailwind + Framer Motion, enabling secure dashboards and interactive reporting, and deployed seamlessly to Vercel via env-driven configuration.

MoodyTunes (In progress), AI powered Mood based Music Recommendation ([Repository](#) 📁)

2025

- ❑ Building an AI-powered mood-to-music app integrating sentiment analysis and Spotify API to generate personalized playlists.
- ❑ Designed a dynamic, emotion-responsive UI with pulsating mood backgrounds, glassmorphism panels, and animated interactions.
- ❑ Will be implementing mood history, trend visualizations, playlist saving, and customizable profile settings for a personalized experience.

GrabCredit, AI Powered Lending Agent for GrabHack ([Repository](#) 📁)

2025

- ❑ An autonomous agentic AI system using LangChain, GPT-4, FastAPI, WebSocket for real-time loan processing with transparent chain-of-thought reasoning and automated financial coaching capabilities.
- ❑ Implemented XGBoost, Scikit-learn for credit scoring, bias detection algorithms, and explainable AI techniques achieving approvals of under 5 minutes with comprehensive integration of the financial API ecosystem.
- ❑ Processes loans in under 5 minutes, improving approval efficiency by 95%

SKILLS

Languages	C, Java, JavaScript, HTML, CSS, Python
Frameworks	React.js, Node.js, Express, Tailwind CSS
Databases	MySQL, MongoDB, OracleSQL
Tools	Git, GitHub, Figma, Adobe PS, Vercel
Soft Skills	Problem Solving, Teamwork, Management, Adaptability

ACHIEVEMENTS / EXTRACURRICULAR

- **Organizing Committee for Revels 2025 :**
 - Coordinated end-to-end logistics for a 3-day cultural festival with 3,000+ attendees, managing venue setup, scheduling, and vendor operations across 15+ events.
 - Led a 12-member logistics team to oversee stage transitions, equipment movement, and resource allocation, reducing downtime between events by 25%.
- **Core Committee for TechTatva 2025 :**
 - Directed the design and fabrication of 3D models props and installations, including large-scale sculptures and thematic décor, creating immersive visual experiences for 3,000+ attendees.
 - Led a 20-member design team to conceptualize and execute stage backdrops, murals, and installations, aligning visuals with the fest's central theme.
- **GrabHack 2025 (Ongoing):** Shortlisted Team-building GrabCredit for Generative AI+Agentic Automation in Fintech([link](#))
- **Adobe India Hackathon 2025:** participation in the contest among 2,62,174 registrations ([link](#))
